SUMMARY

Full-stack software engineer and AI specialist with hands-on experience building production-grade REST APIs, agentic AI systems, and cloud-native infrastructure on AWS. Proficient in Python, Node.js, React, and the LangChain/MCP ecosystem — with a track record of delivering measurable outcomes: 40% faster lead processing, 45% better RAG accuracy, and 50% faster deployments. Passionate about building at the intersection of AI and scalable backend systems.

EXPERIENCE

AceMagick

Chennai, India

Software Development Intern

Jul 2025 – Sep 2025

- Architected full-stack web solutions using Node.js, Express.js, and React across the complete SDLC, integrating CRM systems (Bitrix24) via JWT-authenticated RESTful APIs to automate lead management and cut manual processing by 40%.
- Designed serverless architecture on AWS Lambda with API Gateway, achieving 99.9% uptime and reducing infrastructure costs by ~30% through event-driven, auto-scaling service design.
- Optimized MySQL and MongoDB schemas with indexing and query tuning, improving data retrieval speed by 35%; validated reliability across 50+ Postman test cases in production.

Shami Innovation and Technology Pvt Ltd

Noida, India

Artificial Intelligence Intern

Sep 2025 – Dec 2025

- Built Python-based backend services for AI-driven applications, implementing RAG pipelines with FAISS vector embeddings and semantic search to improve context-aware response accuracy by 45%.
- Applied NLP techniques — text summarization and prompt engineering with Hugging Face models — reducing AI response latency by 30% and measurably improving output quality for production features.
- Designed and deployed scalable REST APIs with CI/CD pipeline integration, cutting deployment time by 50% and ensuring production-ready, maintainable AI service delivery end-to-end.

PROJECTS

latex-resume-mcp | *Python, MCP Protocol, LaTeX, GitHub Actions*

2026

- Built a local MCP server that analyzes job descriptions and surgically edits a LaTeX resume via Claude Desktop, exposing 5 tools: `analyze_jd`, `tailor_resume`, `push_changes`, `read_resume`, `list_sections`.
- Integrated GitHub Actions CI/CD pipeline that auto-compiles resume PDF on every push — zero manual steps and zero cloud cost.

Agentic-CRM — RAG Agent | *LangGraph, FastMCP, ChromaDB, LiteLLM, NeMo Guardrails, Streamlit*

2025

- Designed and deployed a full-stack AI agent enabling policy Q&A and CRM ticket lookup via RAG (ChromaDB + HuggingFace embeddings), orchestrated with LangGraph and MCP tool-calling, with LLM gateway fallback and guardrails, resulting in 89% faster response times.

Store Rating Platform | *React, Node.js, Express, PostgreSQL, Sequelize, JWT*

2025

- Built a full-stack rating platform with role-based access control (Admin, User, Store Owner), JWT authentication, bcrypt hashing, and a normalized PostgreSQL schema with dynamic search, filtering, and sorting.
- Deployed decoupled architecture — React on Vercel, Express API on Render — with SSL-secured database connections and environment-based CORS configuration for production cross-origin traffic.

AI Agent Query / Ticket Assistant | *Gemini API, Inngest, AgentKit, React, Express.js, MongoDB*

2025

- Built a full-stack AI agent system to automate IT query handling using Gemini API for intent classification, AgentKit for multi-step task execution, and Inngest for event-driven workflow orchestration.

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, TypeScript

Web & Frameworks: HTML5, CSS3, React.js, Next.js, Node.js, Express.js, Django

Databases: MySQL, PostgreSQL, MongoDB, Sequelize ORM, RDBMS, Redis

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, VPC, CloudWatch, IAM), Docker, CI/CD Pipelines, Git, Linux

AI & NLP: LangChain, LangGraph, CrewAI, RAG, MCP, Agentic AI, LLM Gateways, Chatbot Evaluation

APIs & Architecture: REST APIs, Microservices, Kafka, System Design

EDUCATION

Guru Gobind Singh Indraprastha University

New Delhi

Bachelor of Technology in Electronics & Communication — GPA: 8.84/10

May 2022 – May 2026

ACHIEVEMENTS & CERTIFICATIONS

Google Cybersecurity Certificate – Network Security Hardening & Cloud Concepts

TCS Cybersecurity Analyst Simulation – IAM Strategy & Security Solution Development

500+ DSA Problems solved on LeetCode/Codeforces, maintaining 1500+ competitive rating

Smart India Hackathon – College Finalist; actively participated in 11 hackathons

Program Manager, IEEE College Society – Led technical community initiatives and engineering events
