SUMMARY

Results-driven software engineer with hands-on experience in Python, React.js, and cloud infrastructure. Passionate about building scalable, maintainable systems and delivering high-quality software in fast-paced environments. Strong background in full-stack development, CI/CD pipelines, and cross-functional team collaboration.

EXPERIENCE

Your Company Name <i>Software Engineer</i>	City, Country <i>Jan 2024 – Present</i>
- Built and maintained RESTful APIs using Python and FastAPI, serving 50K+ daily requests. - Improved database query performance by 40% through indexing and query optimization in PostgreSQL. - Collaborated with cross-functional teams to deliver features using Agile/Scrum methodology. - Wrote unit and integration tests achieving 85% code coverage with pytest. - Delivered key features leveraging Azure and CI/CD pipelines, improving system reliability and team velocity.	
Previous Company <i>Junior Software Developer</i>	City, Country <i>Jun 2023 – Dec 2023</i>
- Developed React.js frontend components and integrated them with Node.js backend services. - Automated deployment pipelines using GitHub Actions, reducing release time by 30%. - Participated in code reviews and maintained documentation for internal tools.	

PROJECTS

resume-maker-mcp <i>Python, MCP Protocol, LaTeX, GitHub Actions</i>	2024
- Built a local MCP server that analyzes job descriptions and surgically edits a LaTeX resume using Claude Desktop. - Implemented 5 MCP tools: analyze_jd, tailor_resume, push_changes, read_resume, list_sections. - Integrated GitHub Actions CI/CD pipeline that auto-compiles resume PDF on every push — zero manual steps. - Architected a zero-cost stack: local Python server + Git + GitHub Actions, no paid services required.	
Your Project 2 <i>Tech Stack Here</i>	2024
- Describe what you built and the problem it solved. - Highlight measurable outcomes: performance, scale, users, etc. - Mention key technologies and architectural decisions.	
Your Project 3 <i>Tech Stack Here</i>	2023
- Describe what you built and the problem it solved. - Highlight measurable outcomes: performance, scale, users, etc.	

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash
Frameworks & Libraries: FastAPI, Django, React.js, Node.js, Express
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: AWS, Azure, Docker, GitHub Actions, Linux
Tools: Git, VS Code, Postman, Jira, Confluence, Figma
Concepts: REST APIs, Microservices, Agile/Scrum, CI/CD, System Design, ORM

EDUCATION

Your University Name <i>Bachelor of Technology in Computer Science</i>	City, State <i>2020 – 2024</i>
