

YOUR NAME

+91-XXXXXXXXXX your@email.com linkedin.com/in/yourprofile github.com/yourusername

EDUCATION

Example Institute of Technology
Bachelor of Technology in Computer Science

City, Country
2020 – 2024

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, Bash
Frameworks & Libraries: FastAPI, Django, React.js, Node.js, Express
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: AWS, Docker, GitHub Actions, Linux
Tools: Git, VS Code, Postman, Jira, Figma
Concepts: REST APIs, Microservices, Agile/Scrum, CI/CD, System Design

EXPERIENCE

Your Company Name
Software Engineer

City, Country
Jan 2024 – Present

- Built and maintained RESTful APIs using Python and FastAPI, serving 50K+ daily requests.
- Improved database query performance by 40% through indexing and query optimization in PostgreSQL.
- Collaborated with cross-functional teams to deliver features using Agile/Scrum methodology.
- Wrote unit and integration tests achieving 85% code coverage with pytest.

Previous Company
Junior Software Developer

City, Country
Jun 2023 – Dec 2023

- Developed React.js frontend components and integrated them with Node.js backend services.
- Automated deployment pipelines using GitHub Actions, reducing release time by 30%.
- Participated in code reviews and maintained documentation for internal tools.

PROJECTS

resume-maker-mcp | Python, MCP, LaTeX, GitHub Actions

LiveCode

- Built a local MCP server that analyzes job descriptions and surgically edits a LaTeX resume using Claude Desktop.
- Implemented 5 MCP tools: analyze_jd, tailor_resume, push_changes, read_resume, list_sections.
- Integrated GitHub Actions CI/CD pipeline that auto-compiles resume PDF on every push — zero manual steps.
- Architected a zero-cost stack: local Python server + Git + GitHub Actions, no paid services required.

TaskFlow Dashboard | React, FastAPI, PostgreSQL

LiveCode

- Describe what you built and the problem it solved.
- Highlight measurable outcomes: performance, scale, users, etc.
- Mention key technologies and architectural decisions.

Cloud Notes API | Python, Docker, AWS

LiveCode

- Describe what you built and the problem it solved.
- Highlight measurable outcomes: performance, scale, users, etc.

ACHIEVEMENTS

- Winner, Example University Hackathon among 40+ participating teams.
- Earned a professional certification in cloud application development.
